ForecastsPro

LEGAL

Terms of Service

The agreement between you and us for ForecastsPro, in plain English. Please read it, especially sections 8 to 11 on AI and risk, and sections 12 to 14 on payment, renewal and why all sales are final.

Version 1.12 · **Effective 20 November 2026** · **Questions:** support@forecastspro.com

---

The short version

1. These Terms
2. What ForecastsPro does
3. Who can use it
4. Your account
5. Your API keys
6. Paper first, then real money
7. Safety rules and hard limits
8. AI and its limits
9. No investment advice
10. No guarantee of profits
11. Risk of loss
12. Price and payment
13. No automatic renewal
14. All sales final; withdrawal
15. Acceptable use
16. Availability and changes
17. Suspension and termination
18. Third-party services
19. Intellectual property
20. Disclaimers
21. Limitation of liability
22. Indemnity
23. Changes to these Terms
24. Governing law
25. Contact and complaints

The short version

This summary helps you find your way; the full Terms below are what apply.

- **ForecastsPro is software.** It is not a broker, an exchange, a custodian or a financial adviser. Your funds stay in your own exchange account; we never hold them.
- **AI analysis runs on an AI model of the provider you choose, Anthropic or OpenAI, and it can be wrong.** Nothing ForecastsPro shows or does is investment advice.
- **We do not guarantee any profit.** Crypto trading is high-risk and you can lose all of the money you trade.
- **Trading is off until you turn it on.** Paper trading, with no real money and at Binance's public market prices, comes first. Real-money trading is available: you switch to it yourself, after accepting a real-money disclaimer and setting a maximum amount and a loss lock that stops all trading when it is reached (section 6). Real-money trading, where available, may be restricted in your country (for example the EU/EEA, UK or US) because of local rules or Binance availability.
- **You use ForecastsPro under your own responsibility.** Using it, and any real-money trading, is at your own risk, and it is up to you to make sure it is lawful where you live (section 6).
- **Tell us where you live.** We ask for your country of residence and do not offer the Service in countries under comprehensive sanctions (section 3).

- **365 days of access cost $999, or $699 while founding seats last** (the founding-member price, also for your renewals: section 12.1), paid in crypto through 0xProcessing. It does not renew automatically. There is no free trial, and all sales are final (section 14).

1. Who we are and how these Terms work

These Terms of Service (“Terms”) are a contract between you and Hypelust Offshore S.A.L., Commercial Register No. 332124, Maarad Street, Beirut 1300000, Lebanon (“ForecastsPro”, “we”, “us”). They cover the website at https://forecastspro.com and the web application at https://app.forecastspro.com (together, the “Service”).

Our Privacy Policy and our Risk Disclosure form part of these Terms. By creating an account, paying for access or using the Service, you agree to them. If you do not agree, do not use the Service. The version you accepted and when you accepted it are recorded with your account; please save or print a copy for your own records.

If you use the Service for a business, “you” also means that business, and you confirm that you may bind it to these Terms.

2. What ForecastsPro does

ForecastsPro is software that helps you analyse crypto markets and, if you choose, automate your own trading on your own exchange account within limits you set. Step by step, in each analysis cycle:

1. **It reads market data.** It reads public market data for the coins on your watchlist, computes technical indicators on two timeframes, and reads the news and sentiment sources you connect.
2. **It asks the AI.** Through your own API key with the AI provider you choose (Anthropic or OpenAI) it asks the AI model to propose one decision per coin (buy, sell or hold) with a size, a confidence score and its reasoning.
3. **The risk gate checks your limits.** Every proposal passes hard-coded risk rules (section 7) that the AI cannot override; a proposal that breaks one is rejected or made smaller.
4. **In Paper mode, orders stay on paper.** If you have turned trading on in Paper mode, the orders that pass the risk gate are filled on paper at Binance’s public market prices, with Binance’s standard trading fee counted and with money that has no real value. No order reaches an exchange.
5. **In Real money mode, it places real orders automatically on your own Binance account**, within the maximum amount you set, without asking you before each order, and after each buy it places a protective stop-loss / take-profit order. When your loss lock is reached, it stops all trading on your account and emails you (section 6).
6. **You can switch it off at any time.** Switching trading off in the app (your emergency stop) stops new orders straight away; you can also stop the scheduler, or remove your keys (section 6).

Every decision, rule verdict and order is recorded in your journal in the app. You can run an analysis on demand, or let the scheduler run it at an interval you choose.

> **ForecastsPro is not** a broker, dealer, exchange, custodian, bank, investment adviser, portfolio manager or fiduciary. We never hold, receive or transfer your funds or crypto assets: they stay with your exchange, in your exchange account, under your exchange’s terms. ForecastsPro places spot orders only. It offers no leverage, margin, derivatives or withdrawals.

3. Who can use ForecastsPro

You may use the Service only if all of the following are true:

- you are at least 18 years old and have reached the age of majority where you live;
- you are able to enter into a binding contract;
- you are not located in, ordinarily resident in, or organised under the laws of a country or territory subject to comprehensive sanctions (for example by the United Nations, the European Union, the United Kingdom or the United States), and you are not listed on, or owned or controlled by someone listed on, a sanctions list;
- you tell us your country of residence truthfully when you create your account (or when the app asks for it), and you tell us if it changes; and
- using the Service, trading crypto assets, and using your exchange and your AI provider's services are lawful for you where you live and where you use the Service.

At the date of these Terms we do not offer the Service to residents of Cuba, Iran, North Korea, Syria, Russia or Belarus, or to anyone located in, or resident of, the non-government-controlled areas of Ukraine (Crimea, Donetsk, Luhansk, Kherson and Zaporizhzhia regions); if you live in Ukraine, we ask you to confirm that you are not. We may add other countries or regions when the law or our providers require it. We do not locate you from your IP address: we rely on what you tell us, and giving us a false country of residence is a breach of these Terms. Only support can change the country on your account, and we may ask you for a document showing where you live, such as a recent utility bill or bank statement; the Privacy Policy says how we use it and when we delete it.

If your account has no country of residence on file 14 days after we started asking for it (or after the account was created, if later), scheduled analyses and new trades pause until you tell us; we email you when that happens, and they resume once you have told us.

If the country of residence on your account is one we cannot serve, we restrict your account: trading and the scheduler are switched off, no orders are placed, and you cannot pay for access, but you can still sign in to download your data and delete your account. We may not be able to refund payments where sanctions rules forbid it.

You are responsible for complying with the laws that apply to you, including tax. We may refuse, limit or end access in any country or region, for example where the Service, your exchange or your AI provider's API is not available, or where offering the Service would break the law.

4. Your account and its security

- Give accurate details, keep your email address up to date and keep your password secret. An account is for one person; do not share it.
- We send your receipt, the reminders before your access ends and password-reset links to your email address, so check it carefully when you create your account. You confirm it with the button in your receipt, or with the link we email when you create your account. Until it is confirmed, and for 48 hours after you create your account, you can correct it in the app, after entering your password; we then tell the old address that it was changed. After that, email us to change it.
- You are responsible for what happens on your account, unless it happened because we failed to take reasonable care.
- Tell us straight away at support@forecastspro.com if you think someone else has accessed your account or your API keys, and revoke the affected keys at your exchange.

- You can delete your account at any time, after confirming your password: from the Account page in the app while your access is active, or, if your access has ended or you never paid, from the billing page you see after you sign in. You can also email support@forecastspro.com from your account's email address and we will delete it for you. Deleting it does not close your exchange or AI provider accounts, and it does not cancel orders already resting on your exchange (section 17). While a payment of yours is still confirming, deletion waits until it is settled (at most 24 hours).

5. Your API keys: your responsibilities

To use the Service you connect API keys for accounts you hold with other services: your exchange (Binance; needed only for Real money) and your AI provider (Anthropic or OpenAI), and optionally news and social data sources. You authorise us to use those keys on your behalf only to provide the Service: to read balances and orders, to place and cancel orders within your settings and the rules in section 7, and to request AI analysis.

When you create an exchange key for ForecastsPro you must:

1. create a new key that is used only for ForecastsPro;
2. enable only reading and spot trading;
3. **keep withdrawal and transfer permissions disabled**;
4. for real money, restrict the key to our server's IP address (shown in Settings); and
5. review or replace the key regularly, and delete it when you stop using ForecastsPro.

We strongly recommend a separate trading account with a cap. Trade only from a separate exchange account or sub-account (for example a Binance sub-account, if you can open one) that holds only the money you are prepared to trade (never your main account) and keep the maximum amount and the loss lock (section 6) within what you can afford to lose. This is a recommendation, not a condition of using the Service: which account you connect, and how much you keep in it, is your decision.

Real-money trading requires exchange keys that we have verified as **trade-only**: we ask the exchange for the key's permissions and refuse a key that can withdraw or transfer funds, borrow on margin, or trade futures or options, that cannot trade spot, or that has no IP restriction. We repeat that check at the start of every real-money cycle and before real orders, and we switch your account's trading off if that stops being true or the exchange rejects the key.

We will never ask for your exchange password, your two-factor codes or withdrawal permission. We store keys encrypted, use them only as described in these Terms, and never show them back to you in full. You can replace or remove your keys in the app at any time (in Settings, or on the billing page if your access has ended), and revoke them at the issuing service at any time.

Only connect keys and accounts that you own or are authorised to use. You remain responsible for your exchange account and your AI provider account, including their terms, fees, limits, identity checks and any rules on automated or API trading. AI usage is billed to you by your AI provider under your own agreement with that provider.

6. Paper first, then real money

Every new account starts with **trading off**: analyses are recorded, but no orders are placed.

Paper trading is the first mode that trades. It trades on paper, with money that has no real value, at Binance's public market prices and with Binance's standard trading fee counted; it places no order on any exchange and needs no exchange keys. Each paper position keeps a stop-loss and a take-profit, which the Service sets and watches on those prices in every mode, also while trading is off and after your Access Period ends. Paper results can differ significantly from real-money results and do not predict them.

Real-money ("live") trading is available: you switch between Paper and Real money yourself, in Settings. Before Real money is switched on for your account, you must:

1. read and accept the real-money disclaimer in the app, which explains step by step what ForecastsPro does and that it will trade automatically, with real money, on your own Binance account;
2. set the **maximum amount** of real money ForecastsPro may have at work at one time; and
3. set a **loss lock**: an amount of loss (US$100 unless you choose another amount) that, once reached, stops all trading on your account and sends you an email.

Real money is also available only where we have enabled it on the platform, and only after you have verified your email address, acknowledged the current version of the Risk Disclosure in the app (when we publish a new version, you acknowledge it again the next time you switch Real money on), and connected exchange keys verified as trade-only (section 5).

- **You choose the amounts.** The maximum amount and the loss lock are limits you set; the risk gate (section 7) applies within them. They limit what ForecastsPro does, not how far prices can move: your losses can be larger than the loss lock amount before it stops trading.
- **Your own responsibility.** You use ForecastsPro, including real-money trading, entirely under your own responsibility and at your own risk. It is up to you to make sure that using it is lawful where you live and allowed by your exchange.
- **You must follow Binance's terms and your local law.** Automated trading on your exchange account must be allowed for you by your exchange and by the law where you live.
- **Real money may be unavailable in some countries.** Real-money trading, where available, may be restricted in your country (for example the EU/EEA, UK or US) because of local rules or Binance availability. We decide where we offer it, and we may change that.
- **No guarantee.** You can lose money, including all of the money you trade, and AI output can be wrong (sections 8, 10 and 11).

We may switch real-money trading off for any account, any region or everyone at any time for legal, security or operational reasons, for example if a law changes or an exchange changes its API.

You can switch trading off (your emergency stop) or back to paper at any time (if your access has ended, switch it off on the billing page). Switching trading off stops new orders, protective ones included. It does not close positions or cancel protective orders already on the exchange. When access is granted again after it had ended, real-money trading starts switched off: you switch it on again yourself.

Manual mode needs no exchange keys, and ForecastsPro places no orders in it, protective orders included. The buys and sells that pass the risk gate are shown to you. Whether to place one is your decision: you place it yourself, with your own money, on the exchange you use, and confirm it in the app. The caps and the kill switch of section 7 count only the trades you confirm. The real-money disclaimer, the maximum amount and the loss lock apply only in Real money mode.

7. Safety rules and hard limits

Every decision the AI proposes passes through a risk gate written in code, which the AI cannot override. Depending on the risk level you choose (low, medium or high), the gate:

- only allows coins on your watchlist;
- rejects buys and sells below the minimum confidence for your risk level;

- caps what the bot holds in each coin at a share of your budget (the per-coin cap) and everything it holds together at your budget (the total budget cap), clamping larger buys to fit;
- pauses new buys when realized losses over the last 24 hours exceed your daily-loss limit (the kill switch), while still allowing sells and protective exits;
- only sells what ForecastsPro bought for you, never coins you held yourself; and
- does not trade a coin while the outcome of an earlier order for it is still unconfirmed.

After a buy in Real money, the Service tries to place a stop-loss / take-profit order on the exchange at the levels in your settings or, where you set none, at levels set by your risk level, your time horizon and how much the coin has recently moved. After a buy in Paper, it sets the same levels on paper and sells the paper position at the first one that Binance's public price reaches. The exact rules and numbers are published on our website under The math behind ForecastsPro.

> **These limits reduce risk; they do not remove it.** The caps limit the capital at work, not your losses. A stop-loss does not guarantee the price you exit at: in fast, gapping or illiquid markets the fill can be much worse, a stop-limit order may not fill at all, and a protective order can be rejected or fail to be placed. Prices can move past any limit before an order fills.

8. AI analysis and its limits

ForecastsPro uses artificial intelligence. Its analysis, reasoning and trading decisions are generated by an AI model of the provider you choose in the app: an AI model provided by Anthropic, PBC, or one provided by OpenAI. Whenever you see analysis, reasoning or a proposed decision in ForecastsPro, it was produced by AI. ForecastsPro calls the AI model with your own API key, under your own agreement with that provider. With Anthropic, if you are in the European Economic Area, the United Kingdom or Switzerland, the provider of the AI service (the API) under that agreement is Anthropic Ireland, Limited. With OpenAI, the provider of the AI service (the API) is the OpenAI entity your agreement with OpenAI names (for example OpenAI, L.L.C., or OpenAI Ireland Ltd for customers in the European Economic Area or Switzerland).

- AI output can be wrong, incomplete, out of date, inconsistent or overconfident, and the same inputs can give different answers.
- **Do not rely on factual statements in AI output without checking them independently.** They may be false, incomplete, misleading or not reflect recent events.
- The AI does not know the future and cannot predict sudden market events. A confidence score is the model's own estimate, not a probability of profit.
- If you turn on trading and the scheduler, orders that pass the risk gate are placed automatically, without asking you first each time. Whether to turn that on is your decision, and you can turn it off at any time.

Anthropic and OpenAI are not parties to these Terms and are not responsible for the Service. ForecastsPro is independent and is not affiliated with or endorsed by Anthropic or OpenAI.

9. No investment advice

ForecastsPro is a software tool. Nothing in the Service, on our website, in our emails or in any support conversation is financial, investment, legal or tax advice, or a recommendation or solicitation to buy, sell or hold any asset. The Service does not know your financial situation, objectives or tolerance for risk.

You decide whether to use it, which coins to watch, your budget and risk settings, and whether to enable automated or real-money trading, and you are responsible for those decisions. If you are unsure whether trading is right for you, get independent advice from a qualified professional.

10. No guarantee of profits

> **WE DO NOT GUARANTEE ANY PROFIT, RETURN OR RESULT.**
>
> Nothing about ForecastsPro (its analysis, indicators, confidence scores, risk rules, paper-trading results or anything on our website) is a promise or a prediction that you will make money or avoid losses. We make no claim about win rates or returns. Past, simulated and paper-trading results do not predict future results. You may lose some or all of the money you trade.

11. Risk of loss

Crypto assets are highly volatile and largely unregulated. You can lose some or all of the money you trade, and you can lose it quickly. **Only trade money you can afford to lose.**

The risks include sharp price moves and gaps; slippage and low liquidity; trading fees; exchange outages, hacks, insolvency, rule changes and delistings; API errors, rate limits and delays; internet, hosting and software failures; stablecoins losing their peg; and changes in law or regulation. The Risk Disclosure explains them in more detail and forms part of these Terms.

12. Price and payment

12.1 Price

Access to ForecastsPro costs **US$999 for 365 days** (an “Access Period”). While founding seats are left, a new customer gets the founding-member price instead: **US$699 for 365 days**. You renew at the price of your first paid order: US$699 if you paid the founding-member price, US$999 if you paid the regular price. Founding seats are limited: how many are left is shown with the price on our website, checkout shows whether the founding-member price is still available, and the price on the pay button is the price of your order. The price is set in US dollars and includes every feature of the Service; there is no free trial.

12.2 Paying in crypto through 0xProcessing

You pay in cryptocurrency through our payment processor, 0xProcessing (operated by 14partners Limited). The coins offered at checkout are USDT on the TRC20 or ERC20 network, BTC and ETH. 0xProcessing’s hosted payment page shows the exact amount of the coin you chose, calculated from the US-dollar price at its exchange rate at that moment.

12.3 Network fees and exchange rates

You pay the blockchain network fee and any fee your wallet or exchange charges for sending the payment, so make sure the full amount arrives. Movements in exchange rates after checkout are your risk.

12.4 The payment window

A payment page is valid for a limited time, typically 30 to 50 minutes. If it expires, start a new payment. Never send funds to an expired payment address.

12.5 Send exactly what is shown

Send only the coin shown, on the network shown, to the address shown. **Funds sent on the wrong network, in the wrong coin or to the wrong address may be lost permanently**, and we may be unable to recover them.

12.6 Underpayments

If less than the full amount arrives, your access is not activated. Contact us at support@forecastspro.com and we will help you resolve it, for example by completing the payment or by returning what arrived less network fees.

12.7 When access starts

Access starts once 0xProcessing confirms your payment to us after the required blockchain confirmations, and we email you a receipt. You can renew from 30 days before your Access Period ends; a payment made while you still have access adds 365 days to the end of your current Access Period.

12.8 Checks by the payment processor

0xProcessing may be required by anti-money-laundering law to verify identities and may ask you for information. Its own terms and privacy policy apply to its service.

12.9 How checkout works

Checkout is one page, in these steps:

1. You enter your email address and choose a password, which creates your account, or you sign in to the account you already have.
2. You choose the coin and network you will pay with.
3. You tick one box. Ticking it records three statements, in this order: that you agree to these Terms and have read the Risk Disclosure; that you understand payments are final, with no refunds except where the law requires one (section 14); and, if you are a consumer in the EU, the EEA or the UK, your express request that we start your access immediately (for a renewal: when your current Access Period ends) and your acknowledgement of what that means for your right to withdraw (section 14.2). The box shows all three in full before you tick it. It is never ticked for you, and you cannot pay without ticking it.
4. You press the pay button, which shows the price (for example “Pay $699”). This places your order with an obligation to pay. We then send you to 0xProcessing’s hosted payment page, where you send the payment.
5. Your access starts when the payment is confirmed (section 12.7), and we email you a receipt.

Until you press the pay button you can correct anything you entered, or leave the page; nothing is charged until you send a payment on 0xProcessing’s page. Your email address is confirmed after your payment, with the button in your receipt (section 4). If you mistyped it, you can correct it in the app until it is confirmed, within 48 hours of creating your account (section 4); the payment keeps the address you gave at checkout in the payment processor’s records.

13. No automatic renewal

Each payment buys 365 days of access. **Nothing renews automatically**, and we will never charge you again without a new purchase from you. We email you 14 days and 3 days before your Access Period ends, and on the day it ends.

When your Access Period ends, analyses and new trades stop for your account, and the app shows only your subscription until you renew, with the controls to switch trading off and remove your API keys. Protective orders already on your exchange stay there until they fill or you cancel them at your exchange. While trading is on, ForecastsPro keeps placing a missing stop-loss / take-profit order for a position it bought, and nothing else. If you

renew after your Access Period has ended, real-money trading starts switched off. Your account, settings and journal are kept until you delete the account, and they are there again as soon as you renew. You can delete the account at any time (section 4).

14. All sales are final, and your right to withdraw

14.1 All sales are final

All sales are final: payments are non-refundable, including if you stop using the Service early, do not use it at all, or are unhappy with your trading results.

This does not affect the rights that mandatory law gives you and that no contract can take away (including the statutory 14-day right to withdraw of consumers in the EU, the EEA and the UK, sections 14.2 to 14.4), or the pro-rata refund when we end your access for a reason other than your breach, stop offering the Service, or make a material change you do not accept (section 14.5).

14.2 Consumers in the EU, the EEA and the UK

If you are a consumer in the European Union, the European Economic Area or the United Kingdom, you have the right to withdraw from this contract within 14 days of your purchase (the day your payment is confirmed) without giving a reason. Your access starts as soon as your payment is confirmed. So at checkout we ask you to expressly request that we start supplying the Service straight away, and to acknowledge that if you withdraw within those 14 days you pay for the days of access you have used, and that you lose your right to withdraw once the contract has been fully performed. You make this request and acknowledgement with the box you tick at checkout (section 12.9): it is the last of the box's three statements, a sentence on its own line that starts "If I am a consumer in the EU, the EEA or the UK". We record it, word for word, with your order.

If you renew while you still have access, your new Access Period starts when the current one ends. At checkout you then ask us to start it at that moment, even if that is within the 14 days; if you withdraw within 14 days of paying, you pay only for the days of the new period you have used by then (often none).

The receipt we email when your payment is confirmed is the confirmation of your contract: it repeats the version of these Terms you accepted, your request to start, when you gave it, and how and until when you can withdraw.

14.3 How to withdraw

Where you have a right to withdraw (section 14.2, or another law that applies to you), you may withdraw within 14 days of your purchase. In the app, use **"Withdraw from contract here"** next to the order on the billing page (also reached from Account, Subscription), then **"Confirm withdrawal"**; it is there for the whole 14 days, whether or not your access is still active. Or send us a clear statement that you are withdrawing, by email to support@forecastspro.com with the subject "Withdrawal", from the email address of your account. You can use the model withdrawal form below, but you do not have to, and you do not need to give a reason. It is enough that you send it before the 14 days end.

We acknowledge every withdrawal by email without undue delay. The unused days of that payment end when you withdraw; days you have from your other payments stay yours. Within 14 days of receiving your withdrawal we refund the price less an amount for the days of access you had before withdrawing (1/365 of the price per day), in USDT to a wallet address you give us unless we agree another way with you.

> **Model withdrawal form**
> (complete and return this form only if you wish to withdraw from the contract)
>
> - To Hypelust Offshore S.A.L., Commercial Register No. 332124, Maarad Street, Beirut 1300000, Lebanon, email: support@forecastspro.com:
> - I/We (*) hereby give notice that I/We (*) withdraw from my/our (*) contract for the provision of the following service (*): ForecastsPro access, 365 days
> - Ordered on (*) / received on (*):
> - Name of consumer(s):
> - Address of consumer(s):
> - Signature of consumer(s) (only if this form is notified on paper):
> - Date:
>
> (*) Delete as appropriate.

14.4 Your other rights

Nothing in these Terms affects rights you have by law that cannot be excluded, including remedies if the Service is not as described or not supplied with reasonable care and skill.

14.5 When we end the Service

If we end your access for a reason other than your breach of these Terms, stop offering the Service, or make a material change you do not accept, we refund the unused part of your Access Period pro rata (sections 16, 17 and 23).

15. Acceptable use

You must not:

- use the Service for anything unlawful, including fraud, money laundering, terrorist financing or sanctions evasion;
- use it to manipulate markets, including wash trading, spoofing or layering;
- connect accounts or keys you do not own or are not authorised to use, or let others use your account;
- try to get around the risk rules, rate limits, security controls or access checks, or probe or test the security of the Service without our written permission (we welcome responsible disclosure at support@forecastspro.com);
- interfere with the Service, place an unreasonable load on it, or scrape it;
- copy, resell, sublicense or reverse-engineer the Service, except where the law allows it; or
- use the Service in breach of your AI provider's usage policies or your exchange's terms.

16. Availability and changes to the Service

We work to keep ForecastsPro running, but we do not promise that it will be uninterrupted, error-free or available at any particular time. It depends on the internet, our hosting providers, market-data sources, your AI provider and your exchange, any of which can be slow, unavailable or change. Scheduled analyses may be delayed or skipped. While the Service is unavailable it does not manage your positions; protective orders already on your exchange keep working there.

We may change, improve or remove features. We will not materially reduce what you paid for during your Access Period without a valid reason (such as a legal, security or third-party change), notice to you and, if you do not accept the change, a pro-rata refund of the unused days.

17. Suspension and termination

You can stop using the Service and delete your account at any time; all sales are final (section 14).

We may suspend or end your access, or switch off automated or real-money trading on your account, if you materially breach these Terms; if we reasonably suspect fraud, abuse or a security risk; if the country of residence on your account is one we cannot serve (section 3); or if the law, a regulator, a sanctions rule or one of our providers requires it. Where it is lawful and practical we will tell you first and give you a chance to fix the problem.

If we end your access because you breached these Terms, you are not entitled to a refund. If we end it for any other reason, or stop offering the Service, we refund the unused part of your Access Period pro rata.

Suspension or termination stops new analyses and new orders. It does not cancel orders already on your exchange or close your positions; you manage those directly at your exchange. When your account is deleted, your stored API keys are deleted with it. You should also revoke them at your exchange.

18. Third-party services

ForecastsPro relies on services run by other companies, including Binance (exchange and market data), Anthropic and OpenAI (the AI models), 0xProcessing (crypto payments), DigitalOcean (application hosting, in Frankfurt, Germany), Cloudflare (website hosting, DNS and network security) and Resend (email delivery), as well as the optional news and social sources you connect. Their own terms and privacy policies apply to your use of them. We do not control them and are not responsible for their acts, omissions, fees, outages, errors, security incidents, insolvency or changes (including an exchange changing or closing its API or restricting your region), except to the extent that we caused the problem.

19. Intellectual property and your data

The Service (its software, design, text and logos) belongs to us or our licensors. We give you a personal, non-exclusive, non-transferable licence to use it during your Access Period in line with these Terms. Your settings, your journal and the AI output generated for you are yours to use as you wish; you allow us to process them only to provide the Service, as the Privacy Policy describes. If you send us feedback, we may use it without owing you anything.

20. Disclaimers

To the fullest extent the law allows, the Service is provided “as is” and “as available”. We give no warranty, express or implied, of merchantability, fitness for a particular purpose, accuracy, availability or non-infringement, and no warranty that any strategy, indicator or AI output is correct or profitable. This does not limit your statutory rights as a consumer (section 14.4).

21. Limitation of liability

Nothing in these Terms limits or excludes liability for death or personal injury caused by negligence, for fraud or fraudulent misrepresentation, or any other liability that cannot be limited or excluded by law.

Subject to that, we are not liable for trading losses, lost profits or missed opportunities; for losses caused by market movements, your settings or decisions, your exchange, your AI provider, our payment processor or other third parties; for losses caused by events outside our reasonable control; or for indirect or consequential losses that we could not reasonably have foreseen.

Subject to the first paragraph, our total liability to you for all claims connected with the Service is limited to the amount you paid us in the 12 months before the event that gave rise to the claim.

22. Indemnity

If you use ForecastsPro for a business, you agree to cover our reasonable losses and costs from third-party claims arising from your breach of these Terms, your misuse of the Service, or your breach of the law or of someone else's rights. This section does not apply to consumers.

23. Changes to these Terms

We may update these Terms to reflect changes in law or regulation, security needs, our Service or our providers. We will publish the new version on our website with its effective date and, for changes that materially affect you, email you at least 30 days before they take effect. If you do not accept a material change, you can end your subscription before it takes effect and we will refund the unused days of your Access Period. If you keep using the Service after that date, the updated Terms apply.

24. Governing law and disputes

These Terms are governed by the laws of Lebanon, and the courts of Beirut, Lebanon, have jurisdiction over disputes about them. If you are a consumer, you also keep the protection of the mandatory laws of the country where you live, and you may bring proceedings in the courts there. Before going to court, please contact us: most problems can be solved quickly by email.

25. Contact and complaints

Hypelust Offshore S.A.L., Commercial Register No. 332124, Maarad Street, Beirut 1300000, Lebanon. Email: support@forecastspro.com. We aim to reply within 48 hours.
